TECH

HEAT WELDED MICROFIBER UPPER

The suplest EDGE³ shoes feature a seamless heat welded upper that is made from an extremely thin and lightweight microfiber, which is very resistant and supple at the same time. This upper offers the needed support and flexibility as well as enough breathability with the punctual air holes and poly mesh zones.

The Anatomic WRAP tongue construction is designed to snug around the foot to provide an unparalleled comfortable fit. At the same time this foot position allows a good power transfer onto the pedals.

CARBON SHIELD

The thin carbon layer ensures the pressure distribution on the instep.

BOA IP1/L5 DIALS

The excellent holding power is provided by the BOA Dials, which offer an unparalleled precise fit.

ERGO 360° INSOLES BY SOLESTAR

The suplest EDGE³ shoes use Ergo360° insoles powered by SOLESTAR. These insoles have been specifically developed for cycling. The innovative and patented Stabilization-Delta of the SOLESTAR cycling insoles maximizes the rider's performance by stabilizing the foot, reducing the recurrent shear forces, and optimizing the body posture.
